(54) Title: SESSION MANAGEMENT

(57) Abstract: A method of managing sessions (68, 70) between a plurality of mobile terminals and a server having a plurality of threads (74, 76) comprises grouping the sessions (70) into a plurality of groups (72) and assigning a server thread (74) to each group of sessions. The sessions are grouped by using a special thread (76) referred to as an acceptor thread. The sessions typically involve gathering information from the Internet.
